

Essay 1

We all have some kind of an ability inside us. Some of us have an ability that could make ourself rich like a good singing voice or a creative mind. But anyway even we all crated equal, but human is human, we are selfish, we always want more.

Since I am just like other human being I wish I could wake up one morning and have the ability to turn into an insect, no just kidding. I wish I have the ability to see through object.

Seeing through object is very useful I don't mean looking at people's pravite stuff. What I use this ability is to help the society, not doing big thing but little thing that people don't awar of.

For example, I can use my ability to look at sawer system, I can see which pipe is get old and rust so the sawer department can fix it first before it blow up. I can also use my ability to find hidden wapone at the airport. You know machine is machine you can't trust it fully. Well I am different, I am a live, I can make decision, I can look at the package and see is it a gun, durg, bomb or other dangous stuff.

My ability can really do more useful stuff. This two example is just to show what I can do with it and how its been use. I an use it the opposite way and distory the world.

Essay 2

There are a lot of things that I cannot do, I wish I could be able to do these things. Sometime when I have a hard time with something, I just want to put it behind me and I don't want to deal with it. Sometime there're a things in my life I just could deal with it.

When I have a problem most of time I would go to sleep and hopefully when I wake up there're no more problem. When I wake up I wish there're no problem for me to deal with it. Everyday, everywhere I go I have to use the money, I have to use car to go to places, I need to pay the rent. I need to find a good job, I need to be able to solve my problem. I just wish that I have an ability to creat come interesting business for myself when I wake up. If I have an ability to create some new business for myself, it would be a lot better than before, especially with my economic, and my life style. But there're still a lot of problem that I have to dealing with because of my economic change just like people say "more money more problem." But still I just wish that I have an ability to create some new interesting business.

Problem always acure only each individual to sole it or makes the problem a little eassier for themselfe. For me a problem or bad situation always acure every day life. When I could think of anything, I would put myself to sleep and when I wake up I wish I could have an ability to think and create an interesting business.

Essay 3

Yes, I truly believed that in everyday of our lives movies and television influence people's behavior. Many people in all over the world become influence from the media. There are too many things in movies and television influence people's behavior. Teenagers dress and act from what have they seen on television. Everyone dresses different because there are so many fashions that they could choose. It is also sad that in movies and television, they shows violence and that is where the people especially teenagers influence the killing, drugs, and alcohol from watching television.

For me, the best part of watching movies are watching romantic movies and also comedy movies. It makes my day very relaxing when I watch movies. People should not really believed from what they seen on television because sometimes things are not real. People should only enjoy and have a relaxing time while watching movies and television.

There are millions of things that movies and television give and share for the media. Television can entertain us when there is nothing to do. There are news that we could watch from back home. The have introduce everyone, kinds, teenagers, adults, parents, grandpa, and grandma to entertain us. But we should not let our behavior get to over board and influence us from bad things like violence. It's too scary.

Essay 4

Watching movies and television are most people's activities. People can learn good things and bad things from the movies and television. Such as smoking and crimes show on movies and television that influence people's behavior.

A lot of cigarette companies want to earn more money, they always have advertising on movies and television to teach people how to smoke. People influenced by them because a lot of people want to try. It is because on the movies and television, there are too many cigarette companies are use the advertising to let people to buy cigarette.

On the other hand, movies and television are also can produce crimes too. It is because there are so many violence movies on television. Many people want to fight with other, and do bad things because they learned from the movies. There are a lot of movies showed that it is powerful to become a crime.

I agree that movies and television influence people's behavior. People watch movies and television at most of the time, it would affect people's behavior.

Essay 5

In general, women is not strong enough to attack and kill enemy as soldiers. Most soldiers are usually men, and some women soldiers are going to the army as nurses and chef. In my opinion, women in the army should not be permitted to engage in combat.

When I see people as femanine, it is quiet, mothering and weak. In other words, to be masculine is strong, brave and fearness. Therefore, I see as a woman who doesn't meet as a fighter in the army.

In my country every men has to go to the army for three years. Most women are worried their husbands or boyfriends who go to the army. If I see as opposite way, men wait in home and women go to army, it sounds very strange and uncomfortable to me. So that women who are serving in the army should not go fight and just sit back like a nurse or a housekeeper who waits their husband or boyfriend.

In a war, soldiers have to win for the survive. If women go to fight, it has very low percentage to win the battle. Every soldiers have a responsibility to win the battle for their country.

In conclusion, if two women and one many fight in five minutes who will be defeated? Of course the two women will be defeated by a man. I think most people may have same answer as I am. Therefore when some people think that women who are serving in the army should be permitted to engage in combat, it doesn't make sense to me.

Essay 6

For my point of view in 1940s was the war "none" of women was there but what happen in the now everything has been changed now women want go to combat and kill other enemy but this is only a small war.

If another war coming like the world war II or Vietnam I know the women they not go to fight, they just going go to be Hospital to help the other soldiers but to fight I don't think so we had to thinking first, OH yea you can go but what happen only a minority of women go what happen with the other's they don't like or they don't want it. So that that why I write 1940s because there only men's where in the combat or how many I been die on those wars a not 10 it is thousands and we count and maybe to say it like that is not too much women in this count so we have to be sure to understand womens just want to be the army not to go fight to the big's war, now in somalia there is women but this is not a war, what happen is Saudi Arabi there was not women in the combat why there happen this question because women the just want be army to had a right for women who serving army, for me I don't feel a secure that my girlfirend serving Army but I do she be more secure than me I going be there and for me I don't care to said the women can't go to combat if I said if other war like other had been happen where is going be none are want go.
